AD UNITS

The Packer’s design team is available to work with you to build the creative for your ad to ensure it is effective and impressive.

**Takeover Ads:** A high impact unit the reader must close to access content, takeover ads make our real estate yours. To prevent audience fatigue, we offer a limited quantity.

**Leaderboard:** The widest banner on ThePacker.com and ProduceRetailer.com, the leaderboard is below our top story to maximize viewability and make sure it is seen by the reader. It also appears mid-page and on the footer. This unit sells out quickly.

**Rectangle:** This versatile ad runs in multiple places on all pages, making it a great choice for brand recognition.

**Tower:** Don’t let the audience scroll right by — follow them down the page. This longer form ad lets you play with design and stay in front of the reader longer.

**Content:** Content ads seamlessly integrate with the editorial content, while clearly marked as an advertisement. Pair it with sponsored content from a leader in your company and position yourself as an industry expert.

**Half Page:** For the impression volume of the rectangle and the visual staying power of the tower — you need a half page ad. Spread out and let your message take the space to make a big statement.

**Wallpaper:** The wallpaper ad paints our website with your creative, making a strong, colorful statement.

**Catfish:** The Catfish/Always On unit is, by design, a highly-viewable unit because it affixes to the footer of the browser and remains in a static location within the browser even when scrolling occurs. It predominantly appears on the selected site homepage and can be static, animated or contain video.

**Outstream Video:** As readers scan our articles, these video ads appear within the stream of content. If the scrolling stops, the ad continues. If the readers move past the video ad, the ad ceases. The video can be a standard HD video or a 360-video.

The Packer Mobile App

Readers love The Packer Mobile App – in fact, they are our most engaged audience. The app features the same news you’ve grown to trust — in one easily accessed app that alerts you to the latest news.

More than 1,500 users (and growing!) access more news and spend more time reading articles on an app than on a website. That gives your message more time to be visible, while multiple ad sizes allow for flexible creative options.

- App users look at six times more pages than web viewers. This means more time with your ad.
- App users spend more time viewing content than website visitors — 2:45 versus 1:08. This also means more time with your ad.
- Apps are often downloaded by the top 10 percent users/engagers. That means ads are in front of our most engaged audience.

AD SPECS:
Multiple creative sizes available, particularly 640x100, 600x500, 300x250.

All creative should be submitted to producetraffic@farmjournal.com.
